DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance:

Davis et al. (U.S. 6,126,276) and Hanners (U.S. 6,128,188) both fail to disclose a method of making a micro cooling device comprising the following patentable limitations of the applicant's claimed and disclosed invention:

- doping the top surface of a substrate in a predetermined pattern such that the predetermined pattern facilitates the forming of cooling fins and grooves; and
- coating the doped surface with a material that provides tension on a top surface of the cooling fins.

The combinations of the claimed limitations are novel and found to be allowable over prior art. The cited reference taken singly or in combination does not anticipate or make obvious applicant's claimed invention.

2. Claims 23-26 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
